PROFILE

Electrical & Electronic Engineering student at Khulna University of Engineering & Technology with interests in semiconductor technology, VLSI design, digital systems, computer architecture, and electronics. Currently developing a strong foundation in programming, circuit analysis, electronic systems, and laboratory-based engineering practice, with a long-term interest in research in semiconductor and computer hardware technologies.

EDUCATION

Khulna University of Engineering & Technology (KUET) B.Sc. in Electrical & Electronic Engineering 2025–2029 · Currently 2nd Year, 1st Semester	CGPA **3.82** / 4.00
Notre Dame College, Dhaka Higher Secondary Certificate (HSC) 2024	GPA **5.00** / 5.00

RESEARCH INTERESTS

Semiconductor Technology · VLSI Design · Computer Architecture · Digital Systems · Electronics · GPU and AI Accelerator Architecture

TECHNICAL SKILLS

Programming	C, C++, Python
Engineering & Technical	MATLAB, Arduino, Electronics, Circuit Analysis, Digital Systems
Development Tools	Git, GitHub, HTML, CSS

PROJECTS & LABORATORY EXPERIENCE

Electronic Components & Measurement	Identified electronic components, studied their functions, and performed electrical measurements using laboratory instruments.
Diode Circuit Analysis	Studied diode characteristics and implemented rectifier circuits to understand semiconductor diode behavior and AC-to-DC conversion.
Regulated DC Power Supply	Worked with rectification, filtering, and voltage regulation stages to obtain a stable DC output.
Wave-Shaping Circuits	Analyzed clipper and clamper circuits to study waveform limiting, DC level shifting, and signal modification.
BJT Amplifier Analysis	Investigated common-emitter, common-base, and common-collector transistor configurations and their amplification characteristics.
Transistor-Based Circuit Design	Applied fundamental transistor operation and circuit analysis concepts in practical electronic circuit design.

CERTIFICATIONS & PRESENTATIONS

Participant — Ignition 2026: National Mechanical Festival
Poster Presentation · Department of Mechanical Engineering, KUET · 23–25 April 2026

RESEARCH FOCUS

Currently building a foundation in electronics, semiconductor technology, VLSI design, digital systems, and computer architecture with the goal of beginning formal research projects in these areas. No publications currently.
